

JOH708 JOHN DEERE LIGHT-WEIGHT PUFFER VEST

Designed for everyday dealership, yard and field wear, the John Deere Puffer Vest provides lightweight warmth and weather protection with a focus on sustainable materials. Constructed with a showerproof nylon outer shell and insulated using recycled PET polyester, the jacket delivers reliable comfort while supporting responsible manufacturing practices.

The BIZ ECO™ insulation, made from reclaimed plastic waste, provides warmth without excessive weight, making it suitable for cooler conditions while remaining comfortable for all-day wear. A stand-up wind collar with soft knit bound edge and chin guard helps protect against cold winds, while the full front zip and secure zip pockets provide practicality and convenience.

The vest’s plain non-quilted yoke panel allows clean decoration for co-branding, while the hip-length design with extended back tail improves coverage and warmth. Built for durability and comfort, the John Deere Puffer Vest is a dependable outerwear option for teams requiring a lightweight insulated layer across changing work environments.

Features:
