

JOH834 JOHN DEERE HI-LOFT QUILTED VEST

Designed for lightweight warmth in cooler conditions, the John Deere Hi-Loft Quilted Vest delivers insulation and comfort without unnecessary bulk. Constructed with a durable nylon ripstop outer shell and insulated with premium hi-loft polyfil, the vest traps warm air while maintaining breathability, making it suitable for dealership, yard and field environments.

The ultra-light quilted construction provides warmth while allowing ease of movement during everyday tasks. Horizontal quilted baffles contour naturally to the body, while a plain non-quilted yoke panel allows clear branding application for uniform programs. A high collar stand with chin guard improves protection against cold winds, and practical storage is provided through zippered hand pockets and an internal chest pocket.

Lightweight, functional and easy to layer, the John Deere Hi-Loft Quilted Vest is a reliable outerwear option for teams requiring a comfortable insulated layer across changing working conditions.
