

## JOH833 JOHN DEERE NYLON JAC PAC

Designed for lightweight protection in unpredictable weather, the John Deere Jac Pac offers practical coverage while remaining easy to carry and store. Constructed from 100% nylon taffeta, the jacket provides a showerproof outer layer suitable for sudden changes in conditions across dealership, yard and field environments.

A key functional feature is its packable construction, allowing the jacket to fold neatly into its own zippered pouch pocket for convenient transport and storage. The high-zip collar and hidden tuck-away hood provide additional protection against wind and rain when required. A front zip placket with Velcro storm flap, elastic drawcord hem, and adjustable elasticated cuffs help seal out the elements.

With lightweight construction and practical detailing, the John Deere Jac Pac is a reliable emergency outer layer for teams requiring compact weather protection while working across changing environments.
